Art Unit: 3727

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 21, drawn to a container having a handle, classified in class 220, subclass 771.
- II. Claim 22, drawn to a container having a tie, classified in class 220, subclass 23.83.
- III. Claim 23, drawn to a container having a lightning rod, classified in class 361, subclass 212.
- IV. Claims 24-37, drawn to a container having a second flange and a stacking lug, classified in class 206, subclass 509.
- V. Claims 38-42, drawn to an apparatus having two stacking lugs, classified in class 206, subclass 512.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group I, the container having a handle has separate utility such as a hand held weight. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Luke Pedersen on November 20, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3727

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen J. Castellano whose telephone number is 703-308-1035. The examiner can normally be reached on M-Th 6:30-5.
